

# Cooler Homes Have Smarter Glass

Dynamic glass is designed to give you absolute control of your windows.

Unlike traditional panes, dynamic glass uses smart technology to tint and adjust the light and solar heat coming through your window.

## KEY BENEFITS

### Superior Privacy

Enjoy natural light without compromising privacy. Choose the tint that works best for you.

### Adaptive Glare Control

Maintain visual comfort without the need to move or close the blinds.

### High Performance Light Control

Adjust the amount of sunlight through your window without the need for blinds or shades.

### Up to 10% Energy Savings

Energy modulation through dynamic solar heat gain, developed with the U.S. Department of Energy.

### Maintain Outside Views

Keep a clear view of the world outside your home.

### Improved Sound Attenuation

Constructed with the added benefit of superior noise reduction.

## APPLICATIONS

### Front Entryway Window Systems

### Transom Windows

### Picture & Other Home Windows

## Testimonials

"This solves like five problems at once!"
